Darrin and Bob,

Please confirm if one the following weeks will work for an outage:

- 10/15 – 10/19, primary choice
- 10/22-10/26, secondary option

If one of these time slots are acceptable, I'll inform Delmarva (DPL) of our plans and will copy you. [To confirm, we're planning 4-hour outages for four consecutive nights with the first one beginning on a Monday 11:59PM \(12:00AM Tuesday\)](#) and will end Tuesday at 4:00AM. This will be repeated each night Tuesday through Thursday, with the last outage ending Friday at 4:00AM. There is a chance we might not need the last outage from Thursday 11:59PM (12:00AM Friday) through 4:00AM Friday but we should prepare for this in case the additional time slot is needed.

Best Regards,

**Paul Jesson** – Project Engineer
